Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/541,958	Applicant(s) SEVILLANO GIL, BENITO	
	Examiner HANH V. TRAN	Art Unit 3637	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. This is the First Office Action on the Merits from the examiner in charge of this application.

Specification

2. The abstract of the disclosure is objected to because it includes legal phraseology, such as "invention". Correction is required. See MPEP § 608.01(b).
3. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 1-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 1, "drawer/guide" is indefinite for failing to clearly define the metes and bounds of the claimed invention. Since the term "consists of" is a closed-ended transitional phrase which preclude having additional element(s)

introduced in the claim or any subsequent claims, the recitation of additional elements in the claim renders the claim indefinite.

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. Claims 1-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Mitchell.

8. Mitchell discloses a blocking system for file cabinets comprising all the elements recited in the above listed claims including, such as shown in Figs 1-4, a pull shaft linked to each drawer/guide, which operates a corresponding blocking device, and all the blocking devices of all the drawers are correlated to each other such that opening one of them prevents all others from being opened, the system comprising the following: a support platen fastened to the furniture, which defines a groove-rail with at least a first section and a second section angled between each other a mobile blocking element provided with two emerging blots that can move linearly, guided on the said groove-rail when pulled by the corresponding shaft, fastened to the drawer or its guide as the latter moves linearly; mobile arms aligned between each other, one positioned above and the other positioned below, which can move linearly a maximum amplitude on a vertical rail defined on the support platen where they are guided, wherein the width of the groove-rail, the diameter of the pull shaft, the diameter of the bolts and the maximum amplitude

that the mobile arms can move linearly is the same, such that, with any drawer open, the opening of all drawers is blocked.

Conclusion

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Hoffman '398, Lauchner, Hoffman '855, and Weng all show structures similar to various elements of applicant's disclosure.
